Interactive Flat Panel for Education

As the need grows for more collaborative learning spaces, so does the demand for technology in the classroom. Clevertouch is embracing immersive learning by providing smart digital classroom environments. Our complete classroom solution is easy to use, enables simple installation, and is designed for over 50,000 hours of use. With low maintenance and no ongoing subscriptions, Clevertouch provides a complete all in one solution.

The award winning all-in-one solution for an immersive learning experience

Subscription free software to increase student engagement

Our range of software is designed to engage students and simplify the lesson planning process. Share resources with other teachers and make the most of pre-made lesson and activity templates. Both Lynx and Snowflake MultiTeach are designed with input from educators, enabling teachers to seamlessly collate media and resources to produce innovative lessons.

Apps for connected learning

With content in a variety of languages, for all ages and subjects, and with additional resources available to download for free, Clevertouch makes creating exciting lessons simple for teachers. Cleverstore contains hundreds of apps – all free to download, with no adverts or inappropriate content. All of the apps have been tested by our App team to ensure they meet curriculum requirements.

Screen mirroring with built-in teacher controls

Clevershare App is free to download and compatible with Android, Windows, iOS and Chrome devices. Up to 50 devices can connect with the Clevertouch screen and share content – images, video, and audio. The presenter has full control over what is shared, and can show up to 4 device screens simultaneously, increasing student collaboration and participation within every lesson.

Making integration and installation easier

Clevertouch interactive touchscreens are designed to integrate with your current system set up and work with your current software. With remote management tools, increased security and network options, and the most comprehensive warranty on the market, Clevertouch offers long-term savings and increased return on investment.

A natural and fluid writing experience

Our Super Glide Surface technology provides a natural and fluid writing experience, reminiscent of a pen and whiteboard. High precision touch pens are included, to facilitate dual-pen writing with no lag. Erase with your palm. Pinch and pull to zoom. Switch between finger-touch, pen, and dual-pen instantly without needing to alter settings.

Send messages, alerts and media to all of your Clevertouch screens remotely

With the new Clever Message App send dynamic digital signage messages to all, individual or groups of your Clevertouch screens. Your IT department or office can create messages using full-screen, easy to populate templates, produce live-video messages from the school principal, instructions during a fire drill, building maintenance information, daily news and general announcements.

Connecting people with technology

NEW

Remote management

Control all your screens from a single device.

NEW

Super glide surface

Smooth glass for a fluid writing experience.

Compatible

Compatible with **Windows**, **Mac OS X**, **macOS** and **Chromebook**.

NEW

High precision touch

Improved stylus recognition and assign colours to multiple pens.

NEW

Cloud accounts

Connect instantly to your Google Drive or OneDrive accounts.

NEW

Clever Account profile

Access your apps, settings and files from your NFC Key fob.

Clevertouch Features

Fully customisable

Local team with expert knowledge

Comprehensive warranty

20-point touch

Energy efficient

No software subscription fees

4K resolution display

Smart personalised profile

Remote management

OTA (Over the air) updates

Integrated speakers

Powered by Android

LUX user interface

No shadow

Anti-glare glass

HDMI, VGA, RS232 and USB connectivity

Add web pages

Touch Compatible

Add clocks with date and time

Add sound

Add text boxes

Create animations

Schedule timed messages

Choose from hundreds of themed templates

Assign zones to different staff or departments

Create groups of screens

Works over multiple locations

Remote Management (MDM)

Control multiple Clevertouch devices, wherever they are

The Clevertouch MDM system enables help desks, IT administrators and project leaders to centrally manage and support hundreds of Clevertouch devices, wherever they are. Reaching well beyond the local network boundaries, our Centralised Management System delivers a bird's-eye view of an entire device fleet, enabling administrators to give the best support possible with optimal conditions for decision-making.

Extend your support umbrella, control capabilities and manage Clevertouch screens wherever they are located and operating, both inside and beyond the organisation's network. Manage mission critical and complex IT infrastructures and simplify demanding operation and maintenance work on multiple devices.

Control hundreds of Clevertouch devices remotely

- Create groups to make sure each screen has the most suitable apps and files for where it is used, such as C-Suite, Design Studios, Maths Class, Reception Class, corporate boardroom, huddle room, etc.
- Take control of the Clevertouch screen from your desktop
- Install APKs, policies and files
- Push messages directly to the Clevertouch display, ideal for security announcements
- Anti-theft module – Lock, unlock and reset displays
- Restart or shutdown multiple screen/s remotely by a single click
- Wipe the screen
- Run diagnostics

Optionally, Clevertouch MDM can serve as the basis for managing other devices in the organisation (Android, Windows, iOS and Chrome OS) from a single console, such as desktops, laptops, tablets and smartphones.

Instant Updates (OTA)

Updates delivered instantly

The new Over-the-Air technology means that new features, bug fixes, software and hardware updates can be seamlessly delivered to every Clevertouch screen.

With just the click of a button the Clevertouch screen will search for the latest firmware update and install it, giving you instant access to the latest apps and features.

Patch fixes no longer have to be downloaded onto a USB and uploaded manually, giving IT Managers more time and less hassle.
