Sedao Live
digital signage

Dynamic, Modern and Effective

A large screen powered by a SedaoLive-Pico:

■ Projects a great first impression for a modern, vibrant reception

■ Improves staff, student, patient and customer communications

■ Saves time and money compared with creating, printing and distributing traditional posters

■ Simultaneously informs, entertains, sells and communicates on a single big screen

■ Can implement government and all company/school information policies

## Simple, Powerful, Flexible, Easy to Update, Expandable and Easy to Control

Can one system really be this good?

Yes it can. The SL-Pico uses Sedao's incredible ImageFlyer Cloud Edition software and connects to your **SedaoLive.com** account. Together they represent the culmination of Sedao's 11 years of experience and software development in the digital signage sector.

Unique technology creates dozens of perfectly branded channels to get you started. Later you can create your own unique channels using almost any kind of media and more unique technology called Dynamic Design±. If your network expands Sedao make that simple too, using experience from retail networks with thousands of screens.
